Letter from the President

Dear Valued Customer,

This year, more than ever, will be about purchasing equipment at the right price, getting the best service, and most of all making an investment which make the most sense and give you the best return.

You will see in this catalog that manufacturers have been working hard to create equipment which are smaller, easier to use and importantly inexpensive.

From HiTi's new line of portable Kiosks with wireless options, to the incredible quality of Epson's new and compact (17") 3880 printer, every manufacturer has done their utmost to give you the tools to maximize your revenue by working better and smarter without having to spend a fortune.

For those of you who are still not sure if it is the right time to invest, we have expanded our rental program (see page 22) to allow you to see the equipment in action before deciding if you would like to purchase it.

Finally, we continue to offer you many leasing options, and we are showing our appreciation by rewarding your online purchases with our loyalty program.

The Image Pro team and myself are looking forward to serving you for our 10th year in business.

Thank you for your patronage.

Sincerely,

Frederic Friedmann

Frederic Friedmann
President

ImagePro.Biz

Image Pro International's website ImagePro.Biz is constantly updated with the latest products from all the top manufacturers. We have a dedicated staff for the website to answer any questions necessary, and to assist with the ordering process.

We also provide a newsletter to keep you updated on current releases, as well as tips to help in the field. We will also be starting a Video Demo project to present equipment launches, how to setup devices, and reviews. Follow us on these social networks:

Professional Training

Image Pro International is proud to offer product assistance and training provided by our partnership with Yellow Case LLC, a Miami based digital imaging company with 12 years of experience specializing in the printing industry.

We provide training services in imaging software such as Adobe® Photoshop, X-Rite calibration software, Caldera and Onyx RIP software, Apple products, a range of digital printers and more. Addressing issues at all levels of the digital imaging process, from photography and imaging software, to post-production and digital output. The result is less waste, more savings, and most importantly - less frustration.

Rewards Program

Image Pro Rewards offers exclusive privileges to its participants. As an Image Pro Reward Zone program member, you'll get points for nearly every \$1 you spend at ImagePro.Biz. You can use your reward certificates on virtually anything you buy online at ImagePro.Biz or select from our extensive list of items available on line.

Member Benefits

- No Membership Fee
- Points earned only for purchases made online at ImagePro.Biz
- Special offers during your birthday month
- Special bonus point offers
- ImagePro.Biz - for tracking points, viewing special offers and enjoying member exclusives
- And more!

It's Easy to Join

You can join now online. There's no signup fee and no ongoing membership fee. Just make one qualifying purchase per calendar year to continue your membership. For more information, see our Frequently Asked Questions on our website.

Lease Program

Now it's easy and affordable to acquire the products you need without depleting your cash resources or borrowing from the bank. We are now offering 12 months of 0% interest for orders over \$2000, please ask for more information. By taking advantage of equipment leasing you have a cost-effective way to obtain new printer, camera, or Kiosk at a price you can afford.

Why lease?

- Leasing offers important tax advantages, and your lease payment may even be fully tax deductible (check with your tax advisor).
- Leasing is a practical and cost-effective way to acquire the latest technology and equipment.
- Leasing provides affordable monthly payments with flexible terms and can be structured to match the cash flow needs of your business.
- Your lease can be structured so you own the equipment at the end of the lease. Alternatively, you can return the equipment to the corresponding lender at lease termination with no further obligation.
- Leasing allows easy upgrades to newer technology during the lease.
- Arranging your lease is easy with simple documentation and quick turnaround.

Who can lease?

- Leasing is available to US-based businesses, corporations, professionals and non-profit organizations that will use the equipment in a trade or business.
- The minimum length of a lease is 12 months. Leasing should not be confused with month-to-month equipment rental.
- You may lease your entire Image Pro International order (including products, services, taxes and shipping) that totals \$3000.00 and up.

Rental Program

Because you may not be ready to purchase a new piece of equipment, because you like to try it before you buy it, or you may have a punctual need for a specific machine, Image Pro is now offering the option to rent equipment at very reasonable prices. Equipment is available on a daily, weekly, etc. basis. Call and inquire about our different rental programs.

The program, which offers daily, weekly, monthly or even longer rentals, covers virtually any type of IT equipment, including desktops, laptops, printers, kiosks, scanners, and network components. As part of the one-stop-shopping rental contract, Image Pro handles all rental logistics, including delivery and in some area even setup and decommissioning. Customers can choose to rent new, state-of-the-art technology or they can rent lower-cost, second-generation equipment from Image Pro's pool of off-lease equipment. Read page 22 for additional rental information.

New!

Epson Stylus® Pro 3880

There's so much innovation in this feature-rich printer, you might expect a much larger footprint, but the Epson Stylus Pro 3880 is remarkably compact, equal in size to many 13-inch printers. The compact, 17" wide printer includes Epson UltraChrome® K3 with Vivid Magenta Ink Technology, world-renowned for professional printing applications. This, combined with an advanced MicroPiezo AMCTM print head, enables the Pro 3880 to produce gallery-quality color and black-and-white output up to 17" x 22".

Stylus Pro 3880

The printer's industry-acclaimed ink set delivers a phenomenal color gamut with breathtaking blues and violets. All-new AccuPhoto™ HD2 technology provides smoother color transitions and better highlight and shadow detail for prints with a true photographic look. Epson UltraChrome K3 with Vivid Magenta Ink Technology is a professional, 8-color ink set with advanced magenta pigments that provide more dramatic blues and violets for an impressive color gamut. Its three-level black technology delivers richer blacks, outstanding tonal range and an unprecedented gray balance, all of which ensure outstanding black-and-white prints.

Epson Stylus® Pro 4880

The 4880 also includes a user-adjustable Roll Media Spindle which accepts either 2-inch or 3-inch media cores & Four built-in media paths including roll feed, cut-sheet tray, front-top manual feed, and a straight-through front manual feed for handling up to 1.5mm thick media with a Built-in automatic media cutter.

Stylus Pro 4880

Stand Sold Separately

Epson Stylus® Pro 7880

Epson Stylus® Pro 9880

The 24-inch Stylus Pro 7880 and 44-inch Stylus Pro 9880 professional wide-format printer incorporates forward-thinking designs with a 8-color ink technology, resulting in a final print of uncompromising quality.

Stylus Pro 9900HDR

**Epson Stylus® Pro 7900HDR
Epson Stylus® Pro 9900HDR**

The all-new Epson Stylus® Pro 7900 and 9900 printers. Representing Epson's next generation, the Epson Stylus Pro 7900 (24-Inch) and Epson Stylus Pro 9900 (44-Inch) incorporates Epson's latest achievements in photographic inkjet technology.

By combining the precision of Epson MicroPiezo TFP™ print head with the extraordinary performance of Epson UltraChrome® HDR inks, this newest generation of Epson Stylus® Pro printers continue to represent a level of technology unprecedented in Epson's history. The 7900 and 9900 use a new Ten-color printing system including all-new orange and green inks.

Optional Epson SpectroProofer™ 24 and 44: High-performance in-line spectrophotometer developed jointly with X-Rite®. When driven by the latest front-end RIP workflows, Epson SpectroProofer can automate virtually any color management process in your workflow. Simple installation fits cleanly into the front of the Epson Stylus Pro 7900 or 9900. Incorporates a high-performance X-Rite ILS20 spectrophotometer for extreme measurement accuracy below 0.2 dE94. UV-cut and non-UV-cut versions available at time of purchase. Either black or white interchangeable backing plates included. Built-in print dryer to accelerate the dry-down and reading process.

Epson Stylus® Pro 11880

Imagine producing 64-inch wide archival prints with amazing color fidelity, gloss level, and scratch resistance, while providing consistently stable colors that significantly outperform lesser ink technologies. Imagine producing professional, neutral and toned, black-and-white prints with even higher density levels, along with virtually no metamerism or bronzing. With an even higher level of ink droplet accuracy, Epson developed an all-new MicroPiezo TFP print head, featuring a new ink repelling coating technology to dramatically reduce nozzle clogging. And, when combined with Epson AccuPhoto™ HD screening technology, at an astonishing resolution of 2880 x 1440 dpi, Epson has once again raised the level of image quality.

ImagePROGRAPH iPF5100

ImagePROGRAPH iPF5100 & iPF6100

The iPF5100 (17") and the iPF6100 (24") printers are the ideal solution for any color professional looking for striking, full-bleed color output with strength in paper handling and exceptional speed in output. The 12-color pigment ink system with LUCIA inks offers excellent color fastness and stability with a remarkably wide color gamut. The new ink formulation for Black, Matte Black, Gray and Photo Gray reduces bronzing, while providing stronger ink adhesion to the print media, resulting in better scratch resistance without any additional protection. The Canon L-COA processor, which is dedicated to the imagePROGRAPH, is designed to optimize the best quality output at the highest possible speeds.

ImagePROGRAPH iPF6200

The 24-inch imagePROGRAPH iPF6200 is a versatile printing solution, engineered for exceptional color reproduction. Equipped with an EFI Colorproof eXpress RIP, a built-in 80GB hard drive, 12-color pigment ink system with LUCIA™ inks, and the L-COA controller, the iPF6200 provides the extra data capacity and control that busy agencies, design groups and pre-press operations require. The iPF6200 comes equipped with an EFI Colorproof eXpress software RIP with a simple set-up wizard and intuitive user interface. EFI Colorproof eXpress is designed to enable all levels of users to produce accurate color proofs quickly, easily and effectively. This ICC compliant software enables color definition according to your operation's specific requirements, includes pre-defined modes for proofing, photo and monochrome output and even supports remote job processing and printing. With high speed throughput, advanced twelve color imaging and equipped with an EFI Colorproof eXpress RIP, the iPF6200 is an efficient, accurate and easy-to-use proofing solution.

ImagePROGRAPH iPF8100 & iPF9100

The new iPF8100 44" inch printer is the ideal solution for any color professional looking for impressive, full-bleed color output, strength in paper handling and exceptional speed in output. Advanced professional features such as automatic clogged nozzle detection and compensation for reliability, an 80GB Hard Drive, 330ml and 700ml selectable ink capacity sizes for versatility, a large backlit LCD panel for ease of use, and ink usage tracking for accountability are all part of the new iPF8100 to satisfy every color professional's large format printing needs.

Built to put advanced printing technologies into the hands of artists and photographers the new 60" inch iPF9100 will help you to fulfill your creative potential like never before. With the iPF9100, Canon delivers impressive 60" color output, strength in paper handling and speed in output-everything a professional needs to productively and efficiently create enhanced color materials. The iPF9100 incorporates the new 12-color pigment ink system with LUCIA™ inks, the new L-COA controller, along side a 80GB hard drive. The result, a more predictable printing platform where results can be

consistently achieved. The iPF9100 has opened a world of new possibilities with Canon's workflow solutions that simplify printer operation and expand the creative options for large-format photography and fine art applications.

Both printers are equipped with a unique pallet of 12 colors to deliver a broader gamut for greater tonal range and more precise reproduction color. The new ink formulation for Black, Matte Black, Gray and Photo Gray reduces bronzing, while providing stronger ink adhesion to the print media, resulting in better scratch resistance without any additional protection.

ImagePROGRAPH iPF6000S, iPF8000S & iPF9000S

This 24-inch addition to the large-format S-Series printer family offers a small versatile footprint for those seeking high-speed, high-quality output. Ideal for professional service providers who need to produce more output in less time, the imagePROGRAPH iPF6000S can achieve speeds up to 294 ft²/hr and print a A1 sized print in just a minute. And with an 80GB hard drive, Economy Color Mode, built-in calibration, and borderless printing, the iPF6000S delivers the productivity and capacity to produce more high quality work, at a lower cost and in less time. The imagePROGRAPH iPF6000S includes PosterArtist Lite, Canon's easy-to-use poster creation software. PosterArtist Lite offers many pre-designed templates, royalty free images and clipart, and advanced editing options to help create posters, banners and signage in just four easy steps. You can even personalize your creation by importing your own images and digital camera photos into the program. Let PosterArtist Lite in conjunction with the iPF6000S assist in bringing your large format projects to life by printing eye catching posters, signs and displays in just minutes.

The iPF8000S is ideal for professional service providers who need to produce more output in less time. With high speed throughput up to 350/hr, an 80GB hard drive, borderless printing and other features that maximize productivity, this printer increases overall production capacity and reduces job turnaround time. This production grade printer is more than 40% faster than any other imagePROGRAPH Graphic Arts printer making it ideal for anyone who needs to increase the capacity, productivity and versatility of their large-format printing services.

The new imagePROGRAPH iPF9000S, 60" printer, high speed throughput up to 403 ft²/hr, an 80GB hard drive. Graphic Arts printer making it ideal for anyone who needs to increase the reliability, durability and productivity of their large format printing services.

Photographic/ Glossy Paper

High end photography and portraits demand excellent photographic paper, and we offer a wide variety to meet every printing need. Accurate, clear reproduction of digital images are a breeze with these photographic and glossy media options.

Fine Art Media

Special art work deserves special media. Paintings and digital art superbly reproduce on Fine Art Media. Available in canvas, velvet, photo rag and water resistant styles, our Media meets every fine art printing challenge.

Proofing Papers

Accuracy and clarity are available at every stage of the design process with our selection of proofing papers. Printers, marketers and advertisers can create high quality proofs that help correct errors and enhance artwork before printing.

Backlit Material

Backlit materials are offered in both dye and UV ink-compatible products for illuminated backlit displays in indoor and outdoor locations.

Self Adhesive Material

Self-adhesive materials offer a wide variety of products including coated paper, vinyl, polypropylene and polyester film, as well as laminates for post-processing.

Bond and Coated Paper

For economical, high-quality printing with crisp, sharp text and lines choose one of our bond and coated paper, specially engineered for high production environments and short term signage. For everyday use and draft printing, we have a wide variety of durable, inexpensive coated paper.

Technical Paper

Designed for architecture (AEC), mechanical drawings (CAD) and geographic Information Systems (GIS), technical paper produces crisp black text, fine lines, and medium-density area fills.

Film (Technical and Graphic)

Films are optimized to provide sharp line and plots for archiving, future multiple reproductions and overlays.

Fabric and Textile Material for Sign/ Banner/ Display Media

We offer a wide range of fabric and textile materials appropriate for indoor and outdoor use in retail, trade show or banner applications. Eye-catching signs, bulletins, and announcements are easy to create with any large format printers. To suit every application, our sign and banner media are tear resistant and offer a variety of special features, such as adhesive backing and vinyl coating.

Epson Stylus Pro 7900

All SEAL by Neschen Americas Laminators are precision engineered for the highest quality and performance and offer the best warranty in the business. Models vary from 25" to 62" finishing capability and each machine is profiled for either new or experienced users and incorporates cutting edge features for optimum functionality, safety, value and ease of use.

Converting a print with SEAL by Neschen Americas finishing products enhances, protects, adds function and increases value. By mounting or laminating you can transform any image into a vibrant graphic with enhanced color, special effects or textures that cannot be achieved through printing alone.

A finished print has body, stability and protection from physical wear and tear. Over-laminating a print provides resistance to abrasion or environmental influences that could cause the image to fade or deteriorate.

Finishing will not only enhance and protect but also create business opportunities and increased profitability. Offering your clients a range of products from short-term indoor signage to longer-term outdoor advertising will drive your competitive edge and compliment your existing business and products. Profits reached with every finished product soon re-pay any investment in equipment.

The SEAL by Neschen Americas portfolio offers a choice of equipment, materials and accessories for the novice or most experienced print and finishing professional. The possibilities are only limited by your imagination.

SEAL Mounting and Laminating Films & Adhesives

With over 300 different heat-activated, heat-set and pressure-sensitive materials to choose from, each roll of film is specially constructed for perfect mounting, laminating or encapsulating according to your print type and application.

Tried and tested on the market leading SEAL range of professional wide format laminators, every material is designed for high performance, optimum image vibrancy and protection and virtually always available in a choice of many different finishes and sizes.

Depending on the finished product you are looking to produce, you may need one or a combination of different materials that will effectively 'sandwich' your print to form your graphic. The possible layers of the sandwich and types of SEAL products you would need are shown below:

Over-laminating Film

A clear film with an adhesive that is applied to the top or front side of an image.

An over-laminating film can also be applied to both sides of an image. This is known as encapsulating.

Mounting Adhesive

An adhesive material (film) that is used to bond a printed image to a substrate or surface. Adhesive can be applied to the face or back of an image depending on the finished product.

Backing Film

Designed to apply to the backside of a printed image to obtain some level of opacity and rigidity to prevent curling when rolled up. Backing films 'encapsulate' the image as an over-laminating film is also applied to the top.

Inkjet Printable Vinyls

Create exciting graphics and displays with the SEAL range of unique, fully integrated inkjet printable vinyls for printing with many different ink types including solvent, eco-solvent, UV curable, and latex.

SEAL inkjet media exemplify SEAL's vast experience in wide format digital graphics and are engineered from the latest coating technology. Designed to save time and money, they contain quick drying formulas that allow tight production schedules to be met while producing dynamic photo-realistic output!

SEAL Digital Adhesive Vinyl

The SEAL brand self adhesive vinyl product line fits virtually any application's needs. The range features three performance tiers: Digital Vinyl Elite, Digital Vinyl Capital and Digital Vinyl Performance. Each tier is primarily distinguished by its outdoor durability and vinyl grade, while thickness, opacity and price point are also important to consider based on project requirements.

Inkjet Solvent Vinyl

The perfect choice for solvent printing in the production of indoor and outdoor graphics. These vinyls utilize an advanced, permanent adhesive technology specifically formulated for the best overall performance and the most challenging applications. In addition, the adhesive can be removed cleanly from your mounting substrate by applying heat. Designed for compatibility with solvent, eco-solvent* and UV* inks, these high performance medias deliver outstanding print quality on a wide variety of solvent printers.

With its new line of printers and kiosk Mitsubishi is addressing what professional photographers have been challenged with - quality, speed and cost. The new line has defined the standard by offering high quality photographic output, in a matter of seconds while delivering on lower operating costs. Therefore, the Mitsubishi line of digital photo printers provide professional photographers with new benchmarks in color brightness, accuracy and operating efficiency. These digital photofinishing systems meet the growing consumer demand for immediate, yet high-quality photos. Businesses that offer self-service photo printing can easily increase their profit by investing in Mitsubishi's digital photo systems - You'll also have added confidence knowing that Mitsubishi world-class photo products are backed by a comprehensive warranty, combined with service, support and programs that are already the best in the business.

Express Replacement Assistance Program

In the unlikely event that your unit should not operate properly, it is very reassuring to know that a team of knowledgeable technical support professionals is always a phone call away. Should a replacement unit become necessary, Mitsubishi's ERA program ensures that a working replacement unit is shipped to you within 24 hours for overnight, next business day delivery (when and where available), thus allowing you to continue with your business with minimal interruption.

Mitsubishi CP-9550DW

The CP-9550DW provides continuous high quality performance. For greater versatility, this printer offers five different output sizes with edge-to-edge printing (3.5"x5"; 4"x6", 5"x7", 6"x9")

CP-9550DW: MSRP: \$1995.00.....**See Us For Price, Too Low To Advertise**

CP-9800DW

Mitsubishi CP-9810DW

Now with Matte finish available the CP-9810DW provides print speeds of approximately 8 seconds for a single 4 x 6" print. Batch printing enables output of 400 prints per hour (4 x 6" high grade media). When used with newly developed high grade media offering remarkably broad dynamic range* (16% better than standard media), the CP-9810DW achieves sharp, contrast-rich images with the subtlest of tonal gradations. Enjoy superb color reproduction and rich, deep black and images comparable to silver halide photos.

CP-9810DW:**Coming Soon**

CP-3020DAU

Mitsubishi CP-3020DAU

The CP-3020DAU is an affordably priced digital color photo printer providing Photo-quality 8 x 10 and 8 x 12-inch color prints. Not only does the CP-3020DAU deliver exceptional print quality in either gloss or matte finish, it delivers it in less than 77 seconds.

CP-3020DAU: MSRP: \$1175.00.....**See Us For Price, Too Low To Advertise**

CP-3800DW

Mitsubishi CP-3800DW

Mitsubishi's CP-3800DW is a digital color photo printer that combines high resolution, high speed printing with an innovative, space-saving design. Delivering premium quality output in 4 x 8", 6 x 8", 8 x 10" or 8 x 12" sizes, the CP-3800DW also features hassle-free front access for easy media loading and semi-automatic paper loading for trouble free paper feed. Incorporating a processing applications where bright, bold colors and color accuracy is essential. Provides print speeds of approximately 30 seconds for a single 8 x 10" print (standard mode) and approximately 35 seconds for a single 8 x 12" print (standard mode).

SONY

New! UPDR80

the UPDR80 can print borderless 8x10 and 8x12-inch images, and it also supports multi-cut operation, producing 4x8-, 5x8- and 6x8-inch images. It can output both glossy and ProMatte finishes. With a footprint of just 12.5 inches x 16.75 inches x 8.13 inches and weighing only 25 lbs, the new printer is among the smallest and lightest full-page, dye-sublimation printers available today.

UP-DR80

Sony UP-DR80

Please Call For Price, Too Low To Advertise

Sony UP-DR200

The UP-DR200 offers approximately 30% greater paper capacities than its predecessor. It can hold 700 4x6 prints or 800 5x7 prints. And the front-loading operation and auto-loading mechanism of the UP-DR200 makes for the easiest replacement of paper and ribbon ever.

Sony UP-DR200 MSRP: \$2195.00.....

S2145

Shinko S2145

The Shinko S2145 Specifications is a Dye Sublimation 300DPI (equivalent to 4,800 DPI inkjet) with gradation: 256 in each color (16.7 million total) and print Speed of 6"x4" Size 7 sec.

The included KG Instant Print Software is the perfect compliment to its award winning professional digital photo printer line-up. Any wi-fi enabled camera can instantly send photos to be automatically configured and printed - allowing you to be totally focused on taking the shots. What's more, the software can be easily configured to resize, rotate, add file name, and even add borders and logos.

Shinko CHC-S1245 MSRP: \$2195.00.....Please Call

Shinko S1245

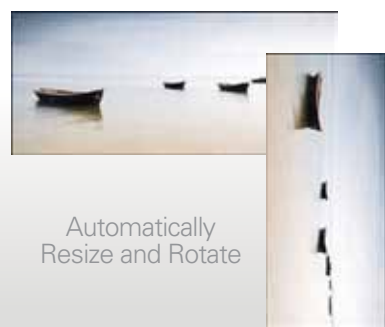

Perfect For Event Photographers - Shoot at events and print instantly. Great for Santa Photos - Have the photos printed before the subject can leave Santa's lap. Works great with Batch Printing - Edit photos and then print the entire batch automatically. Images are resized and rotated automatically. Just place the images in the "hot folder" manually, through a network or wirelessly. It's that easy. The Shinko S1245 professional photo printer makes producing borderless 8"x10" prints fast, affordable, and easy. The S1245 Digital Dye Sublimation Printer is the first compact portable printer capable of borderless 8"x10" prints using dye sublimation technology in a roll format.

The S1245 printer balances high-speed, high capacity and low cost. A professional quality photo is produced in as little as 30 seconds, with as many as 120 prints per hour, that's 2-3 times faster than most comparable cut-sheet printers. The roll media yields 280 8"x10" prints, which is over 5 times the capacity of most cut sheet printers. The S1245 printer is ideal for use in kiosks and high productivity locations. Multiple printers can be daisy chained for even higher capacity. The S1245 printer can operate unattended for over two hours without the need to change paper or ribbons, as is the case with comparable cut sheet printers.

Shinko CHC-S2145 MSRP: \$4250.00.....Please Call

RENTAL PROGRAM 2010:

Because you may not be ready to purchase a new piece of equipment, because you like to try it before you buy it, or you may have a punctual need for a specific machine, Image Pro is now offering the option to rent equipment at very reasonable prices. Equipment is available on a daily, weekly, etc. basis. Call and inquire about our different rental programs.

The program, which offers daily, weekly, monthly or even longer rentals, covers virtually any type of IT equipment, including desktops, laptops, printers, kiosks, scanners, and network components. As part of the one-stop-shopping rental contract, Image Pro handle's all rental logistics, including delivery and in some area even setup and decommissioning. Customers can choose to rent new, state-of-the-art technology or they can rent lower-cost, second-generation equipment from Image Pro's pool of off-lease equipment.
